OBJECTIVE

Full stack Developer with 20 months of experience in developing and testing(QA, automation). Passionate about both growing and new technologies, especially Blockchain. Strong will to learn, grow and contribute to open source communities and a believer in growing together.

EDUCATION

Bachelor of Computer Science , VTU, Belgaum	2016 - 2020
Pre-University(PCME) , Alvas, Moodbidre	2014 - 2016

SKILLS

Languages	JavaScript, Solidity, HTML/CSS, Java, C sharp, SQL
Frameworks	ReactJS, NextJS, Hardhat, node.js, Bootstrap, Tailwind CSS
Development Tools	VS code, Visual Studio, Git, Remix, Figma
Soft Skills	Time Management, Adaptability, Collaboration and Teamwork, Creative problem-solving.

EXPERIENCE

Senior Systems Engineer	Apr 2021
Infosys	<i>Electronic City, Bangalore</i>

- Achieved growth for the service by contributing for development and testing.
- Reduced time, efforts in testing by learning and writing scripts for automation testing.
- Developed Deadlock that prevented point of failures in micro services.

PROJECTS

Created a simple NFT, WisteList DApp : Created my very own NFT by importing ERC-721 token smart contracts from OpenZeppelin as an experiment to learn what happens under the hood. Also developed a website where users can enter into limited WhiteList before release of an NFT.

Lottery DApp : Currently working on a Lottery DApp with a verifiable VRF, finished working on the smart contract and now working on implementing the front-end for the same.

AI minting DApp : Along with the Lottery DApp I'm working on a DApp which helps users mint AI generated images, it's almost done, currently working on storing the NFT in IPFS before mint.

Netflix-clone : Building a clone of Netflix to improve my React knowledge. The landing page displaying the movies, names, posters is ready with styles and next is implementing an authorization page for users to login/sign-up and another page to display Banner, description, trailer of the movie selected!

Quiz-app : Built a quiz app right after finishing React framework for better understanding. We get a set of 10 question of different categories and at the end of the quiz we get the score and paparazzi. Have plans to scale this up so in future.

HOBBIES AND EXTRA-CURRICULAR ACTIVITIES

- I'm an artist, I enjoy drawing and have strong urge to use those skills in creating aesthetically pleasing websites and services.
- I spend ample amount of time networking, reading, exploring different posts, queries in platforms like Reddit, twitter, Stack Overflow, Ethereum Stack Exchange.
- I enjoy nature, trekking, travelling, pets, stand-ups.
